Presented for Transportation Commission Consideration
October 3, 2011

FOREWORD

The Oklahoma Department of Transportation is pleased to provide the 2012-2019 Construction Work Plan, Volume IX. The Plan encompasses critically needed transportation improvement projects on our State and US highways and our Interstates. These projects are recommended through an annual validation and consideration process led by our eight Field Division Engineers and approved by the Transportation Commission.

The State owned highway system in Oklahoma is comprised of the State numbered route highways, the US numbered route highways and the interstate highway system. The state system of highways encompasses 12,265 centerline miles as measured in one direction along the dividing stripe of two lane facilities and in one direction along the general median of multilane facilities. Transportation on our highways is also facilitated via 6,788 bridge structures that span major rivers and lakes, named and unnamed perennial streams and creeks, other roads and highways and railroads. On the average, passenger vehicles, buses and light and heavy trucks traveled more than 66 million vehicle miles each day (daily vehicle miles traveled or DVMT) in 2010 on the non-toll highways in the State of Oklahoma.

The conditional issues that manifest in our bridge infrastructure are well known. Since the year 2000 Oklahoma has consistently ranked as one of the worst states on the national list of structurally deficient bridges. At the most recent peak in 2005 1,163 bridges or a full 17% of all highway system bridges were classified as structurally deficient.

The Department has placed a priority and focused available resources on this chronic problem in earnest since 2003. With the passage of House Bill 1078 in 2005, which initiated the Rebuilding Oklahoma Access and Driver Safety (ROADS) fund, a more diverse funding pool has been brought to bear. As a result, our structurally deficient bridge numbers are expected to drop to 706 of the recorded 6,788 or 10.4% with the release of the adjusted 2010 annual bridge inspection reports.

A thorough review of the current Asset Preservation Plan and the 2011-2018 Construction Work Plan revealed that only 293 of the identified structurally deficient bridges are unfunded and have no scheduled solution. Therefore, as we finalize our annual rebalancing of the Construction Work Plan, it has become increasingly clear that the enormity of the structurally deficient bridge problem that has plagued the highway system for many years can be substantially reduced.

Governor Fallin has chosen to confront this long standing problem head on. She has challenged the Department to prepare an investment strategy that will visit all known structurally deficient bridge conditional issues within an eight year window. In response, this Construction Work Plan includes an additional 126 of the 293 remaining unfunded structurally deficient bridges. The structurally deficient bridges identified as unfunded encompass the remaining 167 structures located in all areas of the State with an estimated improvement cost of $439.3 million in today's dollars.

Fully implemented, Governor Fallin's bold infrastructure investment challenge will provide funding for the remaining structurally deficient bridges and the Department stands ready to effect the improvements. Oklahoman's will witness a complete reversal of our bridge infrastructure conditional standing, as we move from the bottom to near the top during the time period encompassed by this very Construction Work Plan. As envisioned, the Governor sends a clear message regarding our resolve to control our own destiny by investing in ourselves to the betterment of our citizens and in the interest of furthering our economic progress.

Gary M. Ridley
Secretary of Transportation

BUDGETARY PROJECTIONS

Budgetary Projections

CONSTRUCTION WORK PLAN - FFY 2012 through FFY 2019

The budgetary projections utilized for the basis of the fiscally responsible and financially balanced Construction Work Plan were established through a systematic evaluation of the Department's anticipated State-Aid and Federal-Aid revenues and expenditures. Projections were performed for Federal Fiscal Years 2012 - 2019 with the Federal Fiscal Year defined as beginning October 1st and ending on September 30th. The budgetary projections only address funding that has been historically and/or categorically committed to State, Federal and Interstate highway system improvements and does not address Department earmarks or other mandated programs.

For the purposes of the initial projections, an estimated baseline State-Aid amount of $82.17 million and an estimated Federal-Aid amount of $333.9 million was utilized as the Fiscal Year 2012 benchmark. The Federal-Aid amount includes a 7.5% projection overstatement to avoid any potential loss of future Federal-Aid funds due to under programming. Of particular note, the annual baseline State-Aid amount available for Construction Work Plan projects is expected to grow to over $317.8 million during the next eight years.

As the benchmark amount will vary based upon the results of the annual Congressional budgeting process, the estimated projections will require further adjustment and we will adapt our Construction Work Plan accordingly.

Once the Statewide projections are recorded by Fiscal Year, the following formula is applied to establish a baseline Fiscal Year projection for each Field Division:

$$\frac{\text{\% of Population + \% of Mainline Highway System Miles + \% of Previous 15 Year Const. Program}}{3}$$

This formula considers common demographic, physical and historical criteria and yields a Divisional percentage that renders an equitable distribution of the available funds.

CORRIDOR PLAN PROJECTS

The budgetary projections for Federal Fiscal Years 2012 - 2019 are adjusted accordingly to reflect the debt service requirements of the Corridor Plan projects.

The individual project estimates exemplified in the Construction Work Plan constitute approximately 100% of the Federal Fiscal Years 2012 - 2019 anticipated available State and Federal formula funds including the 7.5% overstatement of Federal-Aid and the earmarked Interstate Maintenance funds and excludes the Corridor Plan debt service.

BALANCING PROCESS

Balancing Process

The balancing of the Construction Work Plan progressed in accordance with the roles and responsibilities generally defined in the following outline:

Field Division Engineers

The development of Construction Work Plan begins with our Field Division Engineers and is guided by their knowledge of the transportation needs and priorities in their respective Divisions. They and their staff work to maintain an understanding of the condition of the roads and bridges in their areas of responsibility. In addition, other key Department Divisions collect and analyze transportation data factoring the following general characteristics as applicable and listed in no particular order:

- surface condition
- bridge condition
- geometrics (vertical and horizontal alignment)
- average annual daily traffic (AADT)
- percentage of truck traffic
- accident history
- local, regional and national traffic patterns
- capacity

The understanding gained from this information is then coupled with the careful consideration of the Field Division's condition and capacity assessments of the highway network and the associated critical needs, their anticipated improvement budgets, and further communication with the Division's Transportation Commissioner. The Field Division Engineers then review and validate the scheduled Construction Work Plan projects and formulate a group of new projects to be added in accordance with the projected funding availability.

Planning & Research Division

The Planning & Research Division is responsible for coordinating the State's transportation planning efforts with those of Oklahoma's Metropolitan Planning Organizations, and consulting with the tribal governments and local officials with responsibilities for transportation. The development of the Long Range Plan, the maintenance of the Statewide Transportation Improvement Plan as derived from the first four years of the ODOT Eight Year Construction Work Plan, Corridor Studies, as well as early project development all include opportunities for public participation and review. The results of this public involvement, input from ongoing coordination and consultation, and the planning documents are provided to the Field Division Engineers for their consideration as the Work Plan is developed.

Project Management Division

The Project Management Division works directly with and assists the Field Division Engineers in the development of their respective Division's Construction Work Plan and in

the subsequent daily management of the project development activities. Projects proposed by the Field Division Engineers that did not previously exist in the Construction Work Plan are validated to the extent possible in order to institute a preliminary scope, schedule and budget. Concurrently and to the extent possible, the scope, schedule and budget of projects that previously existed in the Construction Work Plan are re-validated.

The Project Management Division then continues to facilitate necessary modifications to the scope, schedule and/or budgets of approved Construction Work Plan projects as more detailed information becomes available during the course of Project Development. Validation of projects is accomplished through drive outs and/or other project team meetings with the complete participation of appropriate Preconstruction and Operations Divisions as deemed necessary. The responsible Project Manager schedules, coordinates, documents and facilitates these meetings.

Director, Deputy Director and the Chief Engineer

The Director, Deputy Director and Chief Engineer, in concert with the Director of Engineering, Director of Operations, Director of Capital Programs and Information Management, Director of Finance and Administration, the Programs Division, the Project Management Division and the Field Division Engineers work to fiscally constrain and balance the Construction Work Plan in accordance with the percentage requirements of the IM, NH, STP, and BR Federal funding categories. The Work Plan balancing is performed with foremost consideration for maintaining the integrity of the Field Division Engineer's and the Transportation Commissioner's project priorities. In addition, the balancing process seeks to insure that each Field Division is allocated available funding in accordance with the aggregate State and Federal budget projections.

ADDITIONAL CONSIDERATIONS

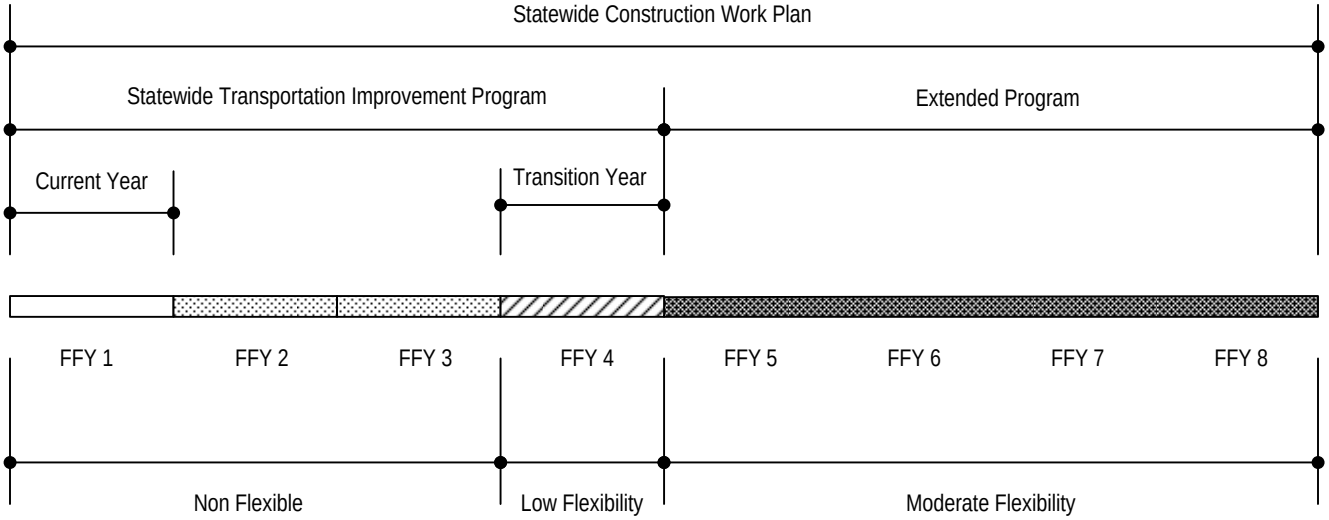
Given the number of extreme variables and the inherent need to maintain a balance between available funds and the Divisional funding commitments, the final Divisional projections are adjusted within a given year. Any adjustments are initiated with consideration for the debt service requirements of the Corridor Plan projects, the ability to schedule and prepare projects for construction in the appropriate Federal-Aid funding categories and the ability to sustain a reasonable annual Construction Work Plan in each Division.

The Construction Work Plan is balanced within these guidelines and has been determined to be an equitable representation to the satisfaction of the Department and the Transportation Commission.

The Interstate Maintenance Earmarking commitment is continued and adjusted as necessary to encourage the substantial replacement, repair and preservation of the Interstate System. The IM Earmark commitment corresponds with the Divisional budgetary dedication by fiscal year.

The Programs Division and the Project Management Division will work in concert with the Field and Central Office Divisions to continue the monitoring and management of the Construction Work Plan in accordance with the provisions of the Construction Work Plan Management Process.

CONSTRUCTION WORK PLAN MANAGEMENT PROCESS



- Projects are "Locked"
- Only modified through formal Program Revision Process
- Must Remain Balanced
- Evaluated yearly (July-August) to prepare for inclusion of Extended Program

- Potential projects to be considered for current program "Lock"
- Refined project Scope/ Schedule/Budget
- Prioritized by Year
- May set minimum criteria for inclusion
- Must Remain Balanced
- Evaluated yearly (July-August) to prepare for inclusion of Extended Program

- Varying levels of Project Development
- Flexible Scope/Schedule/Budget
- Prioritized by Year
- Must Remain Balanced
- Any project can be advanced for consideration in the Transition Year
- Evaluated yearly (July-August) to prepare for inclusion of Unscheduled Projects
