Governor

Terry L. Peach
Secretary and Commissioner

Greetings:

It is indeed an honor to announce the 2010 *Oklahoma Agricultural Statistics Bulletin* for your use. It has valuable information for consumers, industry, and agricultural producers who need reliable data for expansion or possible location in Oklahoma. I am very proud of our partnership with the United States Department of Agriculture's National Agricultural Statistics Service (USDA-NASS) and the outstanding work they do in Oklahoma's Field Office. Wil Hundl, Director, and his staff do an excellent job gathering this vital information.

Agriculture is always changing. We are producing a wide variety of food types from organic, natural and traditional food systems. The world food demand is growing and hunger is one of the biggest challenges Oklahoma and the world face.

This Oklahoma Bulletin will provide valuable data to help meet the future challenges we face. This year you will notice some new information on irrigation trends, as well as new organic food production data for our state.

Oklahoma agriculture must continue to evolve and diversify as global demands change. This great publication will be an important tool to help facilitate that need. Rural Development specialists and agriculturists will all benefit from this document.

The Oklahoma Department of Agriculture, Food, and Forestry and the United States Department of Agriculture's National Agriculture Statistics Service are proud to bring this publication to you. If we can be of greater service, call us.

Sincerely,

A handwritten signature in cursive script that reads "Terry L. Peach".

Terry L. Peach
Oklahoma Secretary of Agriculture

The Land We Belong To Is Grand! - Contributing \$7.1 Billion for Oklahoma's Economy

Agriculture Producers and Data Users:

Oklahoma agriculture survived another year of unpredictable weather, roller coaster commodity prices, and a host of other challenges in 2009. This 2010 edition of *Oklahoma Agricultural Statistics* provides an annual summary of Oklahoma's agricultural industries.

Modern technology has brought changes to nearly every aspect of our lives. Likewise, we believe it is necessary to keep up-to-date information available on agriculture so America's producers, policy-makers, researchers and proprietors may be well-informed too!

Inside the cover of this book is a diverse reference on agricultural production, prices, farm income, and a wide array of other economic and production-related data for the state. Although a bit thinner than last year's edition, which included county-level highlights from the 2007 Census of Agriculture, this will be our second year to provide county-level cash rent statistics on pasture and cropland rental rates.

I would like to especially recognize the staff in the Oklahoma Field Office and our team of NASDA enumerators across the state, and in our Data Collection Center, for their dedication in providing Oklahoma with high quality agricultural statistics. A special note of thanks also goes to the Oklahoma State Board of Agriculture and Oklahoma Department of Agriculture, Food and Forestry for providing essential resources to help make this bulletin possible.

Finally, this publication would not be possible without the support and cooperation from the many farmers and ranchers, agribusinesses, and commodity groups across the state. Through their VOLUNTARY cooperation in providing timely and accurate data, we are able to prepare and publish the most accurate and complete set of agricultural statistics available for Oklahoma!

For your questions, comments, and informational requests, please feel free to contact my office.

Sincerely,

Wilbert C. Hundl, Jr.
State Director

CROP WEATHER

2009 CROP WEATHER REVIEW

- JANUARY:** A lack of precipitation for most of the month of January was alleviated only by a severe winter storm the last week of the month. Sleet and ice covered roads and power lines made travel difficult and resulted in massive power outages and five reported deaths. Despite the ice, precipitation for the month was still well below normal with only 0.69 inches for the month statewide. The lack of moisture affected forage supplies due to the limited growth of wheat and other small grains.
- FEBRUARY:** The precipitation shortage continued into February, which had 0.6 inches less rain than a normal February. Wheat progress was inhibited and the lack of good pasture depleted hay supplies. In addition to being a dry month, February was also the 10th warmest since 1895, almost five degrees above normal. The most significant weather event of the month, however, was the EF4 tornado that struck Lone Grove resulting in eight deaths. This was the strongest February tornado on record and was accompanied by several smaller tornadoes.
- MARCH:** The month began dry with strong winds and burn bans in effect to combat potential wildfires. Moderate drought conditions were alleviated the last week of March when precipitation came in the form of snow. A combination of thunderstorms and snowstorms across the state brought rain, hail and over two feet of snow in the northwestern part of the state. Despite heavy snowfall in some areas, much of the state was still behind normal precipitation levels at the end of the month.
- APRIL:** April brought a variety of severe weather to Oklahoma--from freezes, floods, and fires to twisters and hail. Overall, the month was cool and wet, finally ending the drought-like conditions of the first three months. The state averaged almost five inches of rain, 1.55 inches more than normal. Although the rain was welcomed by producers, small grain crops received some frost damage at the beginning of April and later hail damage was incurred in certain areas.
- MAY:** Heavy rainfall and severe weather continued into May bringing flash floods, hail damage and several tornadoes, including an EF2 that caused damage in Anadarko. The state averaged five inches of rain; however, most of the heavy rains occurred in the eastern and southern parts of the state leaving the northern and western parts still below normal precipitation. A break in the rainfall at the end of the month allowed field work to be completed. Temperatures for the state averaged more than two degrees below normal, making it the 19th coolest May on record.
- JUNE:** As if to make up for a cool May, June was two degrees warmer than normal, ranking as the 26th warmest June since 1895, with a high of 106 degrees at Fairview and Grandfield. The small grain harvest was delayed by a waterlogged spring, but caught up to normal by the end of the month. Most of the state ended the month below normal precipitation with this June being the 27th driest on record. What precipitation did fall was accompanied by hail and strong winds.
- JULY:** The month began with extreme heat and drought, especially in northwest Oklahoma. A record-making high of 115 degrees was recorded for Buffalo and Freedom during the second week. Several cold fronts brought relief and some welcome rainfall, ending the month as the 34th coolest and 27th wettest. However, it was not enough to overcome the rainfall deficit for the growing season.

- AUGUST:** August finished cooler and wetter than normal. The average temperature was two degrees below normal, and the average precipitation for the state was an inch above normal. All but the Panhandle district benefited from August rains, allowing for positive crop progress and conditions, especially during the second half of the month. August storms brought some hail and flooding events, however.
- SEPTEMBER:** The average rainfall for the state was above normal in September, making it the 32nd wettest on record. The rainfall was heaviest in the Southeast district at more than four inches above normal, while the North Central and Panhandle districts were significantly below normal. Fall planting and harvesting progress was made in between rains and cooler than normal weather was a welcome respite in the fields.
- OCTOBER:** Heavy rains delayed small grain planting and row crop harvesting throughout the state. October ranked as the second coolest such month on record and the fifth wettest, 3.51 inches above normal. All nine districts were above normal precipitation for the month, with the eastern half of the state receiving the most rain and accompanying flooding.
- NOVEMBER:** Excess rainfall and abnormally cool temperatures disappeared in November, allowing producers to get back into the fields after a very wet October. This month ranked as the 8th warmest and 22nd driest November since 1895, with more than two inches less rain than normal. All nine districts were below normal precipitation, but soil conditions remained at a rating of adequate throughout the month.
- DECEMBER:** A record-breaking snow storm hit Oklahoma on Christmas Eve, halting holiday traffic and accumulating to a depth of 13.5 inches in Oklahoma City. The storm stranded motorists and caused power outages resulting in multiple deaths. December was extremely cold, almost five degrees below average. Outside of the record snowfall, much of the state was dry for the first half of the month and the state average precipitation was half an inch below normal.

CROPS

2009 CROP PRODUCTION REVIEW

SMALL GRAINS

The 2009 winter wheat crop was a challenge for producers across the state after an excellent year in 2008. Drought-like conditions during most of the growing season were experienced in all districts as precipitation levels were well below normal, severely limiting the yield potential of the wheat crop. An unusually hard freeze the first part of April caused major damage to the wheat crop. Mid-April to mid-May brought heavy rain, hail and high winds across the state. After a production of 166.5 million bushels in 2008, Oklahoma's production was down 54 percent in 2009. The state average yield was 22 bushels per acre, the lowest yield since 2006. Yields of other small grains were also down from the preceding year. Rye production at 560,000 bushels was down 46 percent from 2008. Oat production was up 28 percent at 510,000 bushels, due to an increase of 5,000 harvested acres from the previous year.

ROW CROPS

Row crop production for cotton and soybeans increased from 2008, while production of corn, sorghum and peanuts decreased from the previous year. Cotton production, estimated at 319,000 bales, was up 22 percent from the previous year. Soybean production was up 34 percent from the year earlier to 12.1 million bushels, setting a new record. Production of corn for grain was estimated at 33.6 million bushels, down nine percent from the prior year. Grain sorghum production was down 12 percent from 2008, to 12.3 million bushels. Peanut production was down 32 percent from the previous year. Peanut planted and harvested acres at 14,000 and 13,000 respectively, were the lowest since 1926. Production for canola and sunflowers were published for the first time for Oklahoma in 2009. Canola production was estimated at 48.1 million pounds from the 37,000 acres harvested. A total of 17.5 million pounds of sunflowers were produced. Oil variety sunflowers made up 13.75 million pounds of the total production; with non-oil varieties accounting for the remaining 3.75 million pounds.

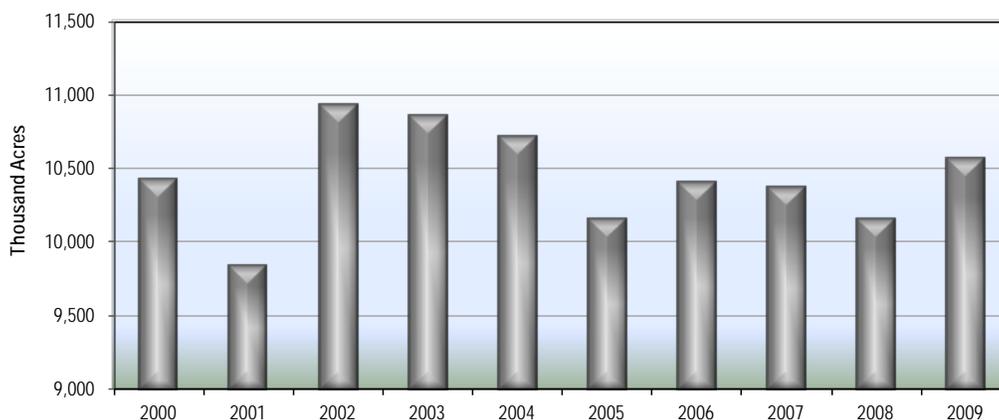

HAY

Production of hay was 5.3 million tons in 2009, down five percent from 2008. Yield averaged 1.64 tons per acre from 3.22 million acres harvested. Production of alfalfa hay, at 928,000 tons, was down 17 percent from 2008. Production of other hay was 4.35 million tons, two percent below the previous year.

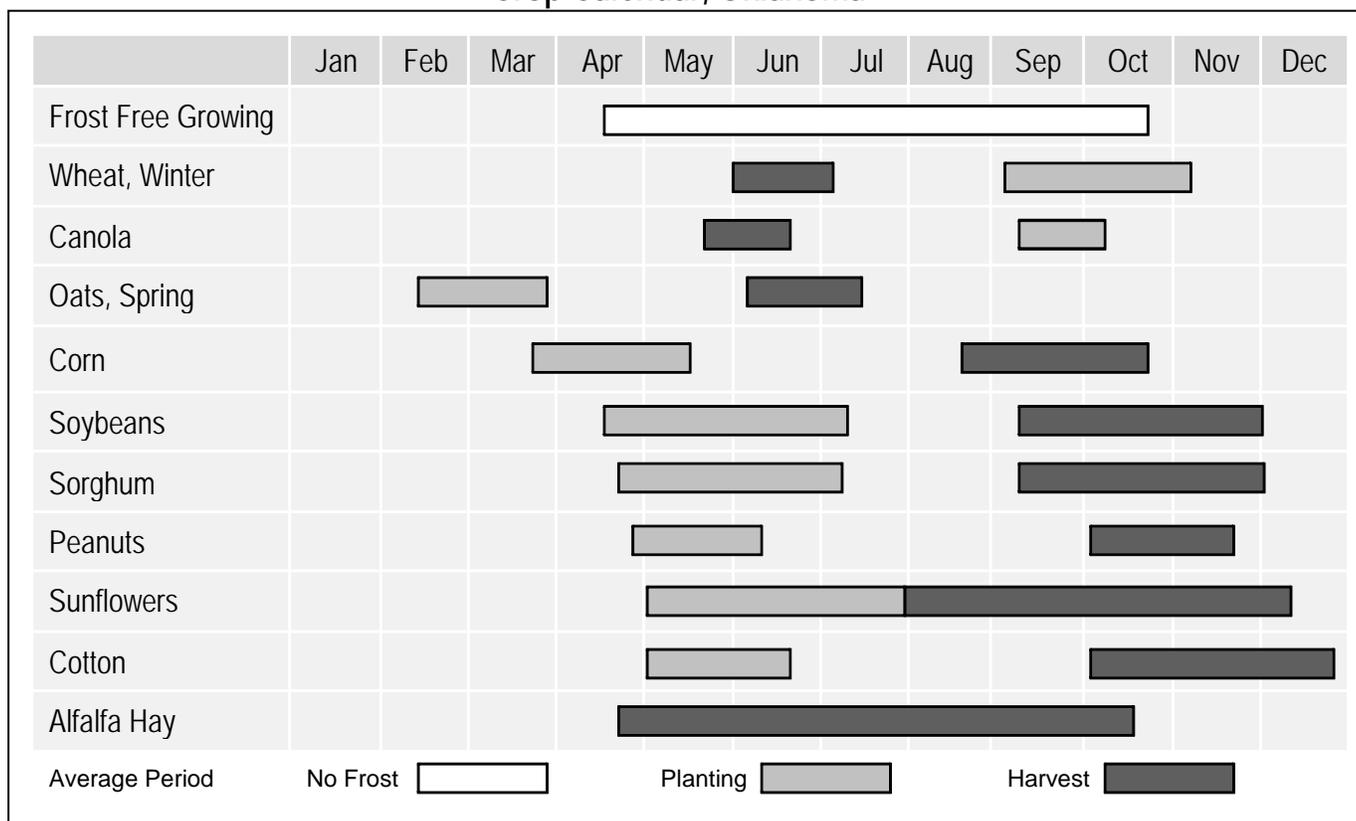

MISCELLANEOUS CROPS

Pecan production was up 170 percent from 2008. Watermelon production decreased 97,000 hundredweight from the prior year to 263,000 hundredweight in 2009, the lowest production on record.

Cropland Acres Planted, Oklahoma, 2000-2009¹

¹ Includes planted acreage for wheat, oats, rye, corn, sorghum, cotton, soybeans, and peanuts plus harvested acreage for all hay. Canola and sunflower acres included beginning in 2009.

Crop Calendar, Oklahoma¹

¹Relates to period when 5 to 95 percent of crop is planted or harvested.

LIVESTOCK

2009 LIVESTOCK REVIEW

Oklahoma's cattle inventory on January 1, 2010, had increased by one percent from a year earlier, while sheep and lamb inventory was down six percent from the previous year. Oklahoma's hog inventory on December 1, 2009, was down five percent from 2008.

CATTLE

Cattle and calves on Oklahoma's farms and ranches on January 1, 2010, totaled 5,450,000 head, 50,000 more than the year before. All cows that have calved, at 2,130,000 head, were up one percent from a year earlier. The cow inventory consisted of 2,073,000 beef cows and 57,000 milk cows. There were 405,000 beef cow replacement heifers, up four percent from the previous year. The 2009 calf crop was 1,900,000 head, up one percent from 2008. The average value per head of all cattle and calves on January 1, 2010, was \$730, down \$20 from a year earlier. The total inventory value of all cattle and calves was \$4.0 billion, two percent less than the previous year.

There were 370,000 head of cattle being fed for slaughter on all Oklahoma farms and ranches on January 1, 2010. Of these, 365,000 were in feedlots with a capacity of 1,000 or more head. Fed cattle marketings during 2009 totaled 694,000 head, up 7,000 head from the previous year. The number of cattle placed on feed during 2009 totaled 748,000 head, up 57,000 head from 2008.

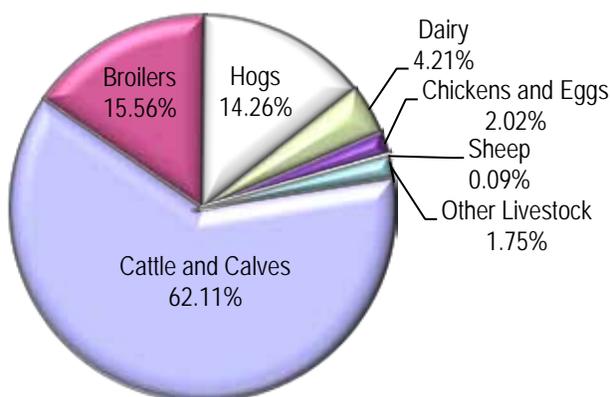

HOGS

The state's hog inventory on December 1, 2009, totaled 2,290,000 head, down five percent from the previous year. The hog inventory consisted of 410,000 breeding swine, up 10,000 head from 2008, and 1,880,000 market hogs, down 120,000 head from the previous year. The 2009 pig crop totaled 6,966,000 head, up 10,000 head from 2008. The average value per head of all hogs and pigs on December 1, 2009, was \$79, down \$1 from 2008. The total inventory value of all hogs and pigs was \$182.5 million, 5 percent below the prior year's value.

SHEEP AND WOOL

Sheep and lamb inventory on January 1, 2010, totaled 75,000 head, down six percent from a year earlier. Of this total, 59,000 head were breeding sheep and lambs, and 16,000 were market sheep and lambs. The 2009 lamb crop, at 45,000 head, was down eight percent from the previous year. The average value per head of all sheep and lambs on January 1, 2010, was \$152, down \$4 from 2009. The total inventory value was \$11.4 million, a nine percent decrease from a year earlier. There were 150,000 pounds of wool produced in 2009, down 32 percent from the previous year. The average price of wool was 40 cents per pound, the same as the previous year.

¹ Month ending rather than week ending; the *Crop Progress and Conditions* is issued monthly during the winter months of January and February.

Number of Livestock Farms, by Class, Oklahoma, 2004-2009 and Historic¹

Year	Cattle	Milk Cows	Hogs	Sheep
	Number of Farms	Number of Farms	Number of Farms	Number of Farms
1980	66,000	5,700	11,000	2,100
1985	65,000	5,300	6,200	2,300
1990	62,000	3,400	5,200	2,700
1995	63,000	2,400	3,400	1,700
2000	60,000	1,900	2,700	1,600
2004	56,000	1,500	2,500	1,900
2005	56,000	1,400	2,500	1,900
2006	55,000	1,400	2,600	2,000
2007	55,000	980	2,700	1,900

2008-2009²

¹ Cattle, hogs and sheep operations for 2007 were revised at the U.S. and State level based on the Census of Agriculture; this is a change from the previous definition of a livestock operation as any place having one or more head of the species on hand at any time during the year.

² The number of operations by state will no longer be published on an annual basis. State level numbers will only be published in conjunction with the Census of Agriculture every five years.

Cattle and Calves: Number by Class and Calf Crop, Oklahoma, January 1, 2006-2010

Class	2006	2007	2008	2009	2010

DAIRY

2009 DAIRY REVIEW

The average number of milk cows in Oklahoma during 2009 was 59,000 head, down eight percent from the 2008 average. Total milk production for 2009 decreased six percent to one billion pounds. The annual average milk production per cow increased to 16,983 pounds, an average increase of 405 pounds of milk per cow, or 2.4 percent.

Oklahoma's dairymen marketed 992 million pounds of milk and cream during 2009. Marketings accounted for 99 percent of the state's milk production. The remaining production was used for household purposes or was fed to calves on the farms where the milk was produced. Total cash receipts, at \$151 million, decreased 29 percent from the previous year.

The number of plants manufacturing dairy products in 2009 totaled nine, the same as the previous year.

¹ Average number on farms during year, excluding heifers not yet fresh.

² Excludes milk sucked by calves.

³ Milk sold to plants and dealers as whole milk and equivalent amounts of milk for cream. Includes milk produced by dealers' own herds and milk sold directly to consumers. Also includes milk produced by institutional herds.

⁴ Cash receipts divided by milk or milkfat in combined marketings.

⁵ Value at average returns per 100 pounds of milk in combined marketings of milk and cream.

⁶ Cash receipts from marketings of milk and cream plus value of milk used for home consumption.

⁷ Includes value of milk fed to calves.

POULTRY

2009 POULTRY REVIEW

CHICKENS

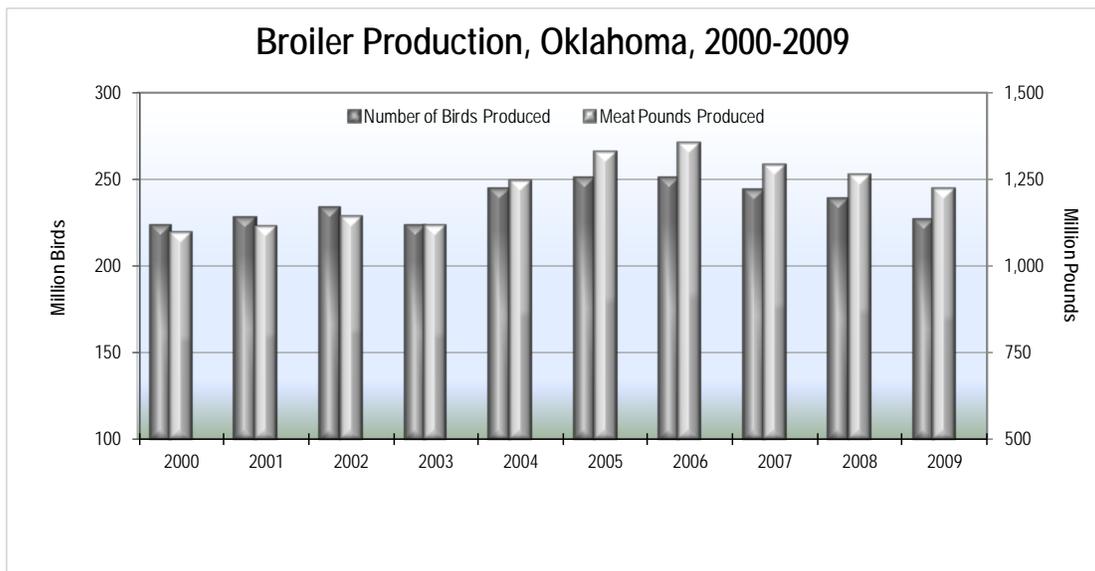

Total chickens (excluding broilers) in Oklahoma on December 1, 2009, numbered 4.54 million birds, down five percent from a year earlier. Hens and pullets of laying age, at 3.26 million head, were down three percent from 2008. The number of pullets not of laying age decreased by eight percent and the number of other chickens (mostly roosters) decreased 20 percent from the previous year. The average value per bird was down 30 cents from the year earlier. Total inventory value of all chickens, excluding broilers, was \$25 million, down 10 percent from 2008, but still up 11 percent from the 2007 total value.

EGGS

Total egg production for the year ending November 30, 2009, was 769 million eggs, down one percent from 2008. The average number of laying hens for the year was 3.33 million head with an average of 231 eggs per layer. The average number of layers was down one percent from the prior year, but the eggs produced per layer remained the same. The price per dozen eggs decreased 15 cents from a year earlier to \$1.10 per dozen. The total value of eggs produced in 2009 totaled \$70.2 million, down 13 percent from 2008.

BROILERS

The state's broiler production was 226 million birds, down five percent from 2008's production. The total liveweight pounds produced was 1.22 billion, three percent below the previous year's production. However, the average liveweight per bird increased by two percent to 5.4 pounds. The average price per pound for broilers, at 46 cents, was the same as 2008. The total value of broiler production decreased four percent to \$557.7 million. Oklahoma was ranked number 12 in the nation for the number of broilers produced in 2009.

Chickens: Numbers by Class and Value, Oklahoma, December 1, 2005-2009^{1 2}

2008	774	1.250	80,888
2009	769	1.100	70,175

¹ Estimates cover the 12 month period Dec 1 of the previous year through Nov 30.

² Includes hatching and market (table) eggs.

FARM ECONOMY

2009 AGRICULTURAL PRICE REVIEW

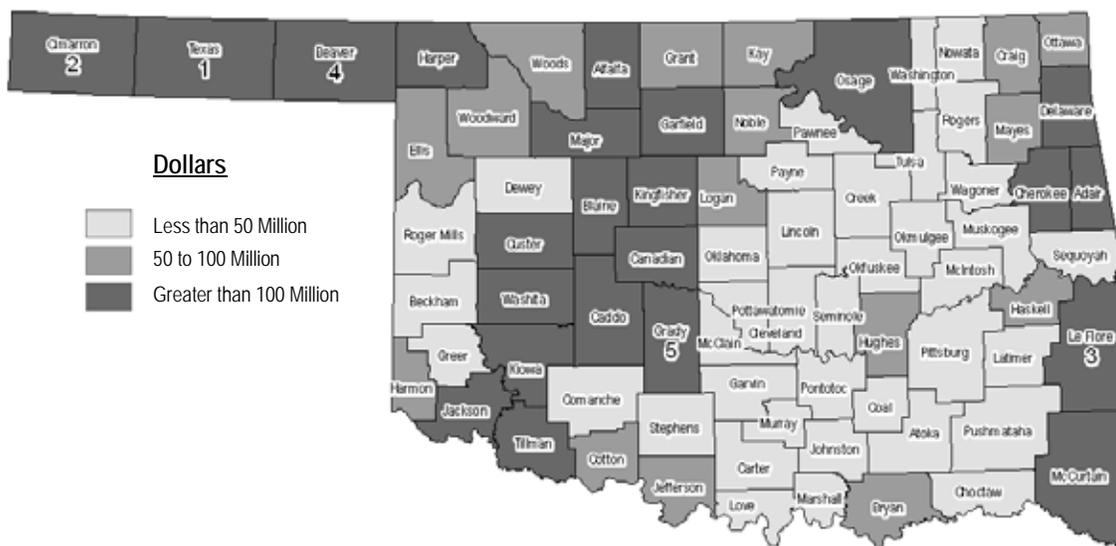

Cash receipts for all Oklahoma commodities sold in 2009 totaled \$4.84 billion, down 14 percent from the previous year. Receipts from livestock and related products, which accounted for 74 percent of the total cash receipts, totaled \$3.58 billion, down 8 percent from 2008. Receipts for cattle and calves sold were down seven percent to \$2.23 billion, while broilers, at \$557.7 million, were down four percent. The third largest livestock item, based on cash receipts, was hogs at \$511.3 million, down nine percent from 2008. Dairy product receipts were down 29% from 2008 sales, at \$150.8 million.

Crop sales for 2009, at \$1.26 billion, were down 28 percent from a year earlier. Food grain sales, which include wheat and rye, totaled \$500 million, down 50 percent from 2008. Feed crop sales, comprised of corn, sorghum, oats and hay, at \$290.9 million, were down 10 percent from 2008. Peanuts declined 45 percent to \$8.8 million. Soybeans, at \$100.1 million, were up 46 percent. Grain sorghum sales were \$38.8 million, up five percent, while hay sales were down slightly at \$131.8 million. Cotton lint and cottonseed, at \$81.6 million, were down four percent from 2008.

Beef cattle prices averaged \$86.70 per hundredweight, down \$7.50; steer and heifer prices averaged \$90.20 per hundredweight, down \$7.40; beef cow prices averaged \$46.40 per hundredweight, down \$6.80; and calf prices were \$105.00 per hundredweight, down \$6.00 from 2008. Milk cows averaged \$1,350 per head, down \$500.00 from the year earlier. Sheep prices averaged \$31.00 per hundredweight, up \$1.00 and lamb prices averaged \$97.00 per hundredweight, unchanged from the previous year. Wool prices averaged \$0.40 per pound, unchanged from 2008. All hogs averaged \$34.80 per hundredweight, down \$3.10 from the year prior. Egg prices were \$1.10 per dozen, down \$0.15.

The 2009 Oklahoma winter wheat market year average price was \$4.80 per bushel, a decrease of \$2.13 per bushel from 2008. The average sorghum price was \$5.95 per hundredweight, an increase of \$0.06 from the previous year. Corn, at \$3.80, was down \$0.66 from 2008. The all hay average price was \$111.00 per ton, up \$17.50 per ton from 2008. Soybeans were \$9.35 per bushel for 2009, \$0.25 per bushel more than the year before. Oat prices were \$2.70 per bushel, down \$0.80 per bushel, and the peanut average price was \$0.205 per pound, down \$0.05 per pound. The market year average price for rye, at \$8.20 per bushel, was up \$1.20. Cotton lint was up \$0.235 per pound to \$0.650 per pound while cottonseed dropped \$70.00 per ton to \$132.00.

NET FARM INCOME³	1,735.0	931.5	829.0	974.5	130.2

¹ Value of agricultural sector production is the gross value of the commodities and services produced within a year. Net value-added is the sector's contribution to the national economy and is the sum of the income from production earned by all factors-of-production. Net farm income is the farm operator's share of income from the sector's production activities. The concept presented is consistent with that employed by the Organization for Economic Cooperation and Development. ² A positive value of inventory change represents current-year production not sold by December 31. A negative value is an offset to production from prior years included in current-year sales. ³ May not add due to rounding. **Source: USDA Economic Research Service**

FOREIGN AGRICULTURAL TRADE

Basis for State Estimates

U.S.D.A.'s Economic Research Service (ERS) publishes estimates of U.S. Agricultural Export contributions by states on a fiscal year basis. These estimates by state for major commodity groups were based on the assumption that state contributions to exports are equal to each state's share of production or marketings. They should not be interpreted as an actual measurement of a state's exports.

Farm marketing ratios from the Census of Agriculture or other sources were used to calculate state shares where production statistics by state were not available. State export estimates for wheat were calculated based on export inspections for major types, including hard red winter, spring, and durum. Census Bureau export data groups all wheat types into a single commodity. Wheat export inspections from different port areas yielded information on hard winter, hard spring, soft winter, and durum. Estimates of feeding and ending stocks for feed grains were used along with production by state.

The share-of-production method was used to compute export shares for cotton, cottonseed, soybeans and products, peanuts, and rice. For some commodities, production was not readily available.

2007 CENSUS OF AGRICULTURE

2008 Farm and Ranch Irrigation Survey

Oklahoma State Profile

The 2008 Farm and Ranch Irrigation Survey shows that Oklahoma farmers and ranchers are irrigating fewer acres. According to the report, 461 thousand acres of farmland in Oklahoma were irrigated in 2008. This is a decrease from the 509 thousand acres irrigated in 2003.

In addition, fewer acres were irrigated with sprinkler systems in 2008 than in 2003. During this five year period, the area irrigated by sprinkler systems decreased 8 percent to 399 thousand acres in 2008. The area with gravity irrigation declined 12 percent to 68 thousand acres in 2008.

Water Applied

Between 2003 and 2008, the total quantity of water applied decreased 12 percent to 525 thousand acre-feet of water. With the corresponding decrease in acres irrigated the average acre-feet applied by all methods decreased from 1.2 to 1.1 acre feet per acre.

	2008	2003	Percent Change
Farms with Irrigation	1,454	1,819	-20
Acres Irrigated	461,000	509,000	-9.4
Acre-feet Applied	525,000	608,000	-13.6
Sprinkler System Only	1.1 acre-feet	1.2 acre-feet	NA
Gravity Flow Systems Only	1.3 acre-feet	1.4 acre-feet	NA

2007 CENSUS OF AGRICULTURE

Water Source

The number of acres irrigated using ground water and on-farm water decreased from 2003, while the number of acres irrigated using off-farm water increased.

	2008	2003	Percent Change
Ground Water			
Acres Irrigated	382,000	413,000	-8
Acre-feet Applied	435,000	507,000	-14
On-Farm Water			
Acres Irrigated	36,000	63,000	-43
Acre-feet Applied	34,000	60,000	-43
Off-Farm Water			
Acres Irrigated	46,000	37,000	+24
Acre-feet Applied	56,000	41,000	+37

Irrigation Wells

Since 2003, the number of wells with flow meters increased 396 percent to 495 wells. The number of wells with backflow prevention devices also increased. In 2008, backflow prevention devices were on 2,550 wells, an increase of 9 percent.

In 2008, the average well depth increased 17 feet to a depth of 237 feet. The average depth to the bowls increased from 182 feet in 2003 to 202 feet in 2008. Furthermore, the average depth to water increased by 6 feet to 119 feet.

Oklahoma State Profile

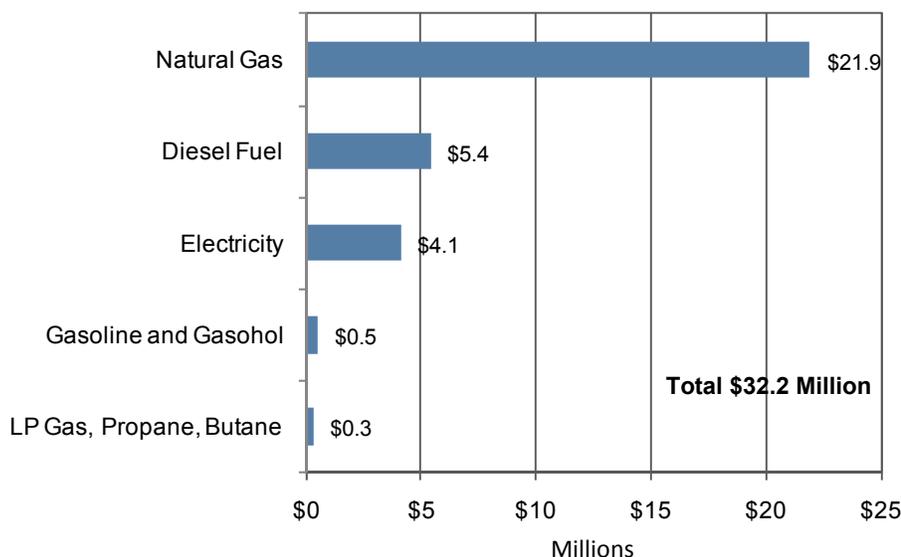

2008 Farm and Ranch Irrigation Survey

Irrigation Expenses

Farmers and ranchers spent \$16.4 million on expenses related to irrigation equipment, facilities, land improvements and computer technology in 2008. Of those expenses, 54 percent was used for replacement of existing equipment, 26 percent for new expansion and 20 percent for water conservation.

The total expenses for energy to power pumps increased 91 percent since 2003. With 21 percent fewer pumps used in 2008, the energy expenses for pumps totaled 32.2 million.

Energy Expenses for Pumps, 2008

Oklahoma's Top 5 Irrigated Crops

1. **Wheat**, 147,000 acres
2. **Corn**, 95,000 acres
3. **Cotton**, 60,000 acres
4. **Other Hay**, 35,000 acres
5. **Sorghum for Grain**, 27,000 acres

Energy and Water Conservation

Between 2003 and 2008, a total of 568 farms implemented changes in equipment or management practices that reduced energy use and/or conserved water. Nearly 44 percent of these farms reported reduced energy cost and 46 percent reported a reduction in the amount of water applied.

Additionally, in 2008 there were 3 farms that purchased a total of 90 acre-feet of reclaimed water at \$33 per acre-foot.

2008	Farms	Acres Irrigated
Recycled Water	77	5,163
Reclaimed Water	40	3,775

Statistical Reports Program

USDA's National Agricultural Statistics Service publishes timely estimates on crop and livestock production, prices, and various other special reports. A list of the more commonly requested reports and the approximate date of release is shown in the table below. Many Oklahoma statistics from these reports are published in the **Oklahoma Farm Statistics** release.

All reports are free to Oklahoma farmers and agri-businesses that provide data to this office, the news media, state and local government, and educational institutions. There is a minimal charge for the printed version of the Oklahoma Farm Statistics and Crop Weather for all other subscribers. These printed reports may be obtained by filling out the report order form on page 85 of this bulletin.

All national reports are available on the Internet at:

<http://www.nass.usda.gov/Publications/index.asp>

and reports for Oklahoma at:

<http://www.nass.usda.gov/ok>

Type of Report	Frequency of Report	Approximate Date Available
I. Crop Reports		
1. Prospective Plantings	Annually	Mar 31
2. Crop Production	Monthly	8 - 12
3. Grain Stocks	Quarterly	Jan 12, Mar 31, Jun 30, Sep 30
4. Crop Production Summary	Annually	Jan 12
5. Crop Values	Annually	Feb 15
6. Winter Wheat Seedings	Annually	Jan 12
7. Wheat Varieties	Annually	Mar 10
II. Livestock Reports		
1. Cattle Inventory and Calf Crop	Semi - Annually	Feb 1, Jul 25
2. Hog Inventory and Pig Crop	Quarterly	Mar 30, Jun 30, Sep 30, Dec 30
3. Sheep Inventory, Lamb Crop and Goats	Annually	Feb 1
4. Livestock Slaughter	Monthly	20 - 26
5. Livestock Slaughter Summary	Annually	Feb 26
6. Meat Animals Production, Disposition and Income Summary	Annually	Apr 29
III. Dairy Reports		
1. Milk Production and Cows Milked	Quarterly	Jan 18, Apr 18, Jul 18, Oct 17
2. Milk Production, Disposition and Income Summary	Annually	Apr 29
IV. Poultry Reports		
1. Chicken and Eggs	Monthly	21 - 29

VI. Miscellaneous Reports		
1. Farms and Land in Farms	Annually	Feb 12
2. Agricultural Land Values and Cash Rents Summary	Annually	Aug 4
3. Farm Labor and Wage Rates	Quarterly	Feb 15, May 21, Aug 15, Nov 21
VII. Crop Weather		
1. March - November	Weekly	Monday, 3:00 pm
2. January - February	Monthly	First Monday, 3:00 pm
VIII. County Estimates		
1. Major Crops	Annually	Feb - Jun
2. Major Livestock	Annually	Jun - Aug

Electronic Dissemination of Data from NASS

NASS has a homepage on the World Wide Web that provides easy access to the broad range of information and data produced. Through the homepage, you can obtain copies of all reports produced by NASS and have access to many other options.

NASS Homepage –
<http://www.nass.usda.gov>

Oklahoma Homepage –
<http://www.nass.usda.gov/ok>

Through a cooperative agreement with Cornell University, the Albert R. Mann Library distributes NASS Economic Research Service (ERS), and World Agricultural Outlook Board (WAOB) periodicals and data files via the USDA Economics and Statistics System on a web server. Over 400 reports annually are available free of charge. All NASS reports and WAOB's World Agricultural Supply and Demand Estimates (WASDE) are available electronically within minutes of release.

A calendar of scheduled releases is available from the NASS Homepage by clicking on **Publications**. Under *Reports Calendar* click on a month to view the reports issued.

Agricultural Statistics Database (Quick Stats)

U.S. and state information, published in NASS national reports, is available through an online database via the internet **FREE OF CHARGE**. The database allows custom extracts based on commodity, year, state and other selection criteria and produces an output file compatible for updating databases and spreadsheets for selected commodities. The database can be accessed from the NASS homepage at: <http://www.nass.usda.gov>. The basic options are in the middle of the screen on the homepage. Clicking on the "more" button under Quick Stats 1.0 will take you to the main menu for Quick Stats. From there you can retrieve state or county level data. The 2007 Census of Agriculture is also available.

County level data are also available via Quick Stats. The data include the total crops for each county and breakouts for irrigated and non-irrigated practices for many crops, for selected states. The database allows custom extracts based on commodity, year, selected counties within a state, or all counties in one or more states. The county data include totals for the Agricultural Statistics Districts (county groupings) and the state. The download data files contain planted and harvested area, yield per acre, and production. Livestock county data are also available for selected states.

Free E-Mail Subscriptions to NASS Reports

It is now possible to receive a NASS report within minutes of its release throughout the year. To arrange for any USDA-NASS reports to be sent free of charge to your e-mail, follow these easy steps:

1. Go to www.nass.usda.gov
2. Select "**Publications**" from the top menu bar
3. Select either "National" or "State" under the "Receive reports by Email" heading, from the "Receive NASS Updates" on the right hand side
4. Follow instructions to complete the process.

The four report options available in Oklahoma are:

Oklahoma Crop Weather; Oklahoma Farm Statistics; Oklahoma Press Releases; and Oklahoma All Reports. You may "unsubscribe" at any time by going to the **Subscription Page** and un-checking the reports you wish to discontinue.

Conversion Factors

Linear Measure (Length)

1 mile	=	5,280 feet or 1,760 yards or 320 rods or 8 furlongs
1 furlong	=	40 rods or 660 feet or 1/8 of a mile
1 rod	=	16 1/2 feet or 5.5 yards
1 yard	=	3 feet
1 foot	=	12 inches

Square Measure (Area)

1 square mile (section)	=	640 acres or 259 hectares
1 acre	=	160 square rods or 43,560 square feet or 10 square chains
1 hectare	=	2.47 acres
1 square furlong	=	10 acres
1 square rod	=	30 1/4 square yards
1 square yard	=	9 square feet
1 square foot	=	144 square inches

Cubic Measure (Volume)

1 cubic yard	=	27 cubic feet
1 cubic foot	=	1,728 cubic inches
1 cord (4' x 4' x 8')	=	128 cubic feet
1 cord foot (4' x 4' x 1')	=	16 cubic feet
2.5 cu. ft of ear corn	=	1 bushel
1.24 cu. ft of shelled corn	=	1 bushel

Liquid Measure

1 barrel	=	31 1/2 gallons
1 gallon	=	4 quarts or 3.7853 liters
1 quart	=	2 pints
1 pint	=	16 fluid ounces

Dry Measure

1 bushel	=	4 pecks
1 peck	=	8 quarts
1 quart	=	2 pints
1 pint	=	2 cups

Weight (Ordinary Commodities)

1 long ton	=	2,240 pounds
1 short ton	=	2,000 pounds
1 hundredweight (cwt.)	=	100 pounds
1 pound (lb.)	=	16 ounces

Commodities

Wheat	Bushel = 60 pounds	Peanuts, Spanish	Bushel = 25 pounds
Soybeans	Bushel = 60 pounds	Peanuts, Runner	Bushel = 21 pounds
Corn (shelled)	Bushel = 56 pounds	Peaches	Bushel = 48 pounds
Grain Sorghum	Bushel = 56 pounds	Barley	Bushel = 48 pounds
Rye	Bushel = 56 pounds	Cotton	Bale = 480 pounds
Oats	Bushel = 32 pounds	Watermelon	Medium = 25 pounds

OKLAHOMA DEPARTMENT OF AGRICULTURE, FOOD AND FORESTRY

The Oklahoma Department of Agriculture, Food and Forestry is made up of 12 Divisions, each of which stands on its own and carries out a specific mission. Together, they form the Department responsible for a various array of agriculture service areas from producing commodities through food safety and consumer protection.

Divisions within the *Oklahoma Department of Agriculture, Food and Forestry* are:

Administrative Services

Agricultural Environmental Management Services

Agricultural Statistics

Animal Industry

Consumer Protection

Food Safety

Forestry Services

General Counsel

Laboratory Services

Market Development

Ag Communications and Outreach

Wildlife Services

For specific information or questions, please contact the individual division by calling the main phone number. Additional information and links are also available on the Department's website.
