

Introduction

Various sources of health indicators and outcomes have been compiled in this report. The overall aim of this report is to create a conversation to identify health priorities that the local community, alongside the local hospital, would like to tackle. No recommendations from the Oklahoma Office of Rural Health, Oklahoma Cooperative Extension Service, and Oklahoma Rural Health Works are made in this report.

Bryan County Demographic Trends and Projections

Figure 1 delineates Bryan County along with the nearby hospital. Much of the health data are only available at the county level. Therefore, rather than exploring individual zip codes and places within Bryan County, county data will be examined.
