Duplicate Providers—Nursing Home Oxygen

OHCA has received several complaints from providers who supply oxygen at nursing facilities regarding duplicate providers.

It is important for providers to obtain the history of equipment rental for SoonerCare members who move into a nursing facility. In many cases, there are other companies who are currently serving the member in their home.

OHCA may require a copy of a current CMN, delivery ticket, change of supplier form, and a history of oxygen concentrator maintenance to determine the appropriate provider to pay for the service when two or more suppliers bill for oxygen in the same month.

Contact me if you have questions on this matter.

Provider Data File

Providers have access to their provider file to make corrections of address, phone #'s and email addresses.

Please update your contract file with the most current data especially email address and phone # for future methods of communication.

New Provider Listing will be posted to website on October 1, 2012.
