## OFFSITE MEDIA STORAGE

OMES provides and supports a secure offsite storage facility in its Data Center for other agencies to store their offsite backup tapes, documentation and other items required for disaster recovery. This facility is secured with card-key access and is monitored by security cameras 24x7. For additional fees, a courier service can be established for the pick-up and delivery of media.

#### Includes:

- 24x7 access availability
- Security controlled physical access to media

## Requesting OMES Services
